INTRODUCTION

BOBCAT'S HISTORY

In 1958, Melroe Manufacturing Company introduced a compact front-end loader that evolved quickly into the M400, the world's first true skid steer loader. The company soon adopted what became the world-famous 'Bobcat' brand – and its success paved the way for the global compact equipment industry we know today.

BUILT TO LAST

DOUTSTANDING UPTIME

R-Series loaders feature an extremely durable transmission with welded axle carrier and proven maintenance-free drive chain. It's unibody steel frame with integrated chain case makes the machines suitable for daily work in the most demanding environments, such as demolition sites and other industrial applications.

With a special focus on uptime, the R-Series features many small improvements that minimize maintenance and protect your machine: self-diagnostics, machine shutdown protection, battery run-down protection, cold weather protection, improved lubrication and access to greasing points, improved protection of hoses, and more.

EXTENDED SERVICE INTERVALS

R-Series loaders feature a new fuel filter with more than double the media surface area, protecting the system even better and greatly extending the life of the filter. The improved engine design also significantly lengthens the air filter's life. This and other features allow you to improve efficiency and reduce operating costs, thanks to extended service intervals. Bobcat recommends first service after 500 hours of operation.
